Lo sviluppo è sostenibile se soddisfa i bisogni delle generazioni presenti senza compromettere le possibilità per le generazioni future di soddisfare i propri bisogni.

(Brundtland Report, United Nations, 1987)

E' tempo di green made.

Green Made significa pensare, progettare e produrre in armonia con l'ambiente.

Green Made: perché In una economia globale assume un ruolo sempre più importante la protezione delle risorse disponibili ed in particolare lo studio degli aspetti ambientali legati alle diverse attività produttive. L'aumento dei consumi delle risorse non rinnovabili (i minerali ed i metalli come pure i combustibili fossili), dovuto alla costante crescita della popolazione mondiale, impone standards di produzione che privilegino la conservazione delle risorse disponibili. I nostri processi produttivi sono frutto di una globale attenzione alla tutela dell'ambiente.

La gestione accurata di questi processi ha portato, tra le altre cose, all'ottenimento della certificazione UNI EN ISO 14001

«Sistema di gestione ambientale certificato».

Green Made: il valore Ogni singola fase di progettazione e produzione è attentamente analizzata sotto il profilo dell'impatto ambientale ed ogni scelta successiva dettata dal raggiungimento degli obiettivi di eco compatibilità. Così durante la produzione vera e propria, saranno le più avanzate tecnologie appositamente sviluppate ed i più severi controlli, effettuati da personale qualificato, a garantire Green Made by Colombo Design: un prodotto nato con il pensiero costantemente rivolto all'ambiente.

Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

(Brundtland Report, United Nations, 1987)

It's green made time.

«Green made» means thinking, developing and manufacturing in harmony with our environment.

Green Made: why Protecting our resources is more and more important in a global economy, and in particular paying attention to reflections of manufacturing onto the environment. Increase of consumptions of non-renewable resources (minerals, metals and fossil combustibles) due to increase of population, imposes manufacturing standards which privilege conservation of the available resources and raw materials. Our production processes are the result of a total attention to environmental protection. By the accurate management of these processes we obtained the UNI EN ISO 14001 certification «Certified environmental management system».

Green Made: values Each design and production step is carefully checked with regards to the environmental impact and each following decision is taken if our eco-compatibility objectives are fully reached. This means that when we manufacture our products, the Green Made concept by Colombo Design will be guaranteed by the advanced technologies and very strict controls carried out by a very highly qualified personnel, generating a product conceived constantly thinking of the environment.

Our Warranties.

30

Trattamento di protezione garantito 30 anni.

Trattamento con la garanzia di "30 anni" sulle finiture **HPS Zirconium Gold, Oromat, HPS/SS Satinata, Grafite, Grafite Mat, Vintage e Vintage Mat**. I prodotti trattati con il processo PVD garantiscono prestazioni di lunga durata. L'utilizzo di questi prodotti è particolarmente indicato in ambienti corrosivi, come aree marine ricche di salsedine o in zone soggette a piogge acide. L'utilizzo in pieno sole e le escursioni di temperatura non pregiudicano l'estetica del prodotto con viraggi di tonalità del colore. La durezza del rivestimento e il basso coefficiente di attrito superficiale garantiscono un'ottima resistenza ai graffi dovuti, per esempio, all'utilizzo di anelli. Eventuali ammaccature provocate da urti o colpi possono intaccare l'integrità e provocare il decadimento delle prestazioni del rivestimento.

Treatment protection guaranteed 30 years.

Treatment with warranty of "30 years" on **HPS Zirconium Gold, Matt gold, HPS/SS Satin, Graphite, Matt Graphite, Vintage and Matt Vintage** finishings. All PVD-treated products with High Protection System finishing guarantee better performance than any other type of coating, either galvanic or lacquer. The use of these products is strongly recommended in such places as high-salinity marine areas or areas subject to acid rains. The use in bright sunshine and temperature ranges does not cause color changes. The hardness of the coating and the low rate of surface friction ensure a very good resistance to scratches due to the use of rings (for example). Any dents due by hits or impact can spoil the surface and affect the coating performance.

10

Trattamento di protezione garantito 10 anni.

La lunga esperienza maturata nel settore dei trattamenti galvanici, unita alla scelta di prestare particolare attenzione alla qualità nei processi produttivi, consentono a Colombo Design di garantire le finiture dei suoi prodotti oltre la normale copertura prevista dalla legge. E' quindi con particolare orgoglio che offriamo ai nostri utenti la garanzia di "10 anni" sulle finiture **Cromo, Satinata, Bianco opaco e Nero opaco**.

Per un utilizzo ottimale del prodotto, ed ottemperare alle regole della garanzia: evitare l'impiego di sostanze solventi, abrasivi, alcool; rimuovere le eventuali tracce di sporco e polvere solo con un panno inumidito in acqua tiepida.

Treatment protection guaranteed 10 years.

The long experience in the field of galvanic treatments, combined with the choice to pay special attention to the quality in production processes, enable Colombo Design to ensure the finishings of its products beyond the normal warranty provided by law. It is therefore with great pleasure, we offer to our end-users the warranty of "10 years" on **Chrome, Satin, Matt white and Matt black** finishings. This commitment of product durability is our strong and alternative response to consumerism «disposable». For maximum performance, kindly comply with the rules of warranty: do not use solvents, abrasives or alcohol; remove any traces of dirt and dust only with a cloth damped in water.

PVD

Pvd collection, ispirata dai nuovi colori di tendenza.

Il trattamento PVD (Physical Vapor Deposition) è un processo di altissimo livello tecnologico che, mediante deposizione fisica da vapore di una sottile pellicola di straordinaria durezza, permette di ottenere un rivestimento superficiale dalle eccezionali caratteristiche estetiche e tecniche. Una tecnologia utilizzata per offrire tonalità cromatiche stabili nel tempo e per garantire prodotti con elevata durezza superficiale, inalterabilità ai raggi UV, resistenza all'usura, all'abrasione e alla corrosione. Garantito 30 anni e realizzato internamente negli stabilimenti produttivi Colombo Design mediante l'utilizzo di una speciale macchina, il trattamento PVD è disponibile nelle finiture Oromat, Zirconium Gold, Zirconium stainless-steel, Vintage, Vintage Mat, Grafite e Grafite Mat.

Pvd collection, be inspired by new trending colors.

PVD (Physical Vapor Deposition) treatment is a process of the highest technological level which allows to obtain a surface coating with exceptional aesthetic and technical characteristics through physical vapor deposition of a thin film of extraordinary hardness. A technology used to offer stable color tones over time and to guarantee products with high surface hardness, inalterability against UV rays, resistance to wear and corrosion. 30 years warranted and obtained internally in the Colombo Design production plants using a special machine, the PVD treatment is available in Oromat, Zirconium Gold, Zirconium stainless-steel, Vintage, Vintage Mat, Graphite and Matt Graphite finishes.

La collezione Forever è stata appositamente progettata per un fissaggio a muro e vetro ottenuto con uno speciale nastro biadesivo in schiuma acrilica ad alte prestazioni (3M™ VHB™). Le caratteristiche tecniche di questa serie, unite ad un sistema di montaggio semplice e rapido, consentono un utilizzo dell'accessorio in condizioni difficili senza mai pregiudicare la tenuta e l'estetica. Le strisce biadesive sono già premontate sul pezzo e, per la preparazione della superficie del muro, all'interno della confezione sono presenti un kit di pulizia ed uno stick con il primer/attivatore.

Attenzione: si sconsiglia l'applicazione dei pezzi su superfici particolarmente ruvide o poco compatte, come intonaci, muri grezzi, resine, piastrelle strutturate e mosaici.

The Forever collection has been specially designed for a wall and glass fixing with a special high performance double sided acrylic foam tape (3M™ VHB™). Adhesive strips are already preassembled on the piece and, for the preparation of the wall surface, inside the box there is a cleaning kit and a stick with the Activator/primer.

Warning: we do not recommend the application of the pieces on particularly rough surfaces such as plaster, raw concrete walls, resins, textured tiles and mosaics.

Our Plus collection is delivered complete with screws, plugs and Allen key.

OPTIONAL - Esiste altresì la possibilità di utilizzare per ogni punto di fissaggio un kit con biadesivo (Art. B523M). Il biadesivo è premontato sulla ghiera e, per la preparazione della superficie del muro, all'interno della confezione sono presenti un kit di pulizia ed uno stick con il primer/attivatore.

Attenzione: si sconsiglia l'applicazione dei pezzi su superfici particolarmente ruvide o poco compatte, come intonaci, muri grezzi, resine, piastrelle strutturate e mosaici.

OPTIONAL - Wall fixing with adhesive is available. Please ask for the correct component for each fixing point (Art. B523M). Adhesive strips are already preassembled on the piece and, for the preparation of the wall surface, inside the box there is a cleaning kit and a stick with the Activator/primer.

Warning: we do not recommend the application of the pieces on particularly rough surfaces such as plaster, raw concrete walls, resins, textured tiles and mosaics.

1
Avvitare l'attacco a muro dell'accessorio scelto alla ghiera del kit B523M.
Fix the standard wall fixation dummy of the selected accessory to the ring B523M.

2
Utilizzare la salvietta detergente per pulire accuratamente la parete dove verrà applicato l'accessorio.
Use the cleaning paper to clean carefully the surface where the accessory will be applied.

3
Rompere l'ampolla interna dell'attivatore Primer 94.
Crush the inner casing of the Primer 94 activator.

4
Rimuovere la pellicola del biadesivo posta sul retro della ghiera.
Remove the film from the adhesive located on the back side.

5
Applicare con forza la ghiera sulla zona dove in precedenza è stato utilizzato il Primer 94, accertarsi del corretto allineamento prima della messa a muro.
Press firmly the ring on the surface where the Primer 94 activator was previously used, pay attention to the correct alignment before the fixation.

6
Fissare l'accessorio scelto alla ghiera a muro, i valori massimi di tenuta dell'accessorio vengono raggiunti dopo 24 ore dall'applicazione.
Fix the selected accessory to the ring wall, reminding that the maximum resistance of the accessory is achieved after 24 hours from application.

Si sconsiglia l'applicazione dei pezzi su superfici particolarmente ruvide o poco compatte, così come su intonaci, cemento o muro grezzo. Per tali ragioni, non potendo prevedere dove e come sarà impiegato il prodotto, l'azienda declina ogni responsabilità per installazioni su parti non idonee ed ogni uso non corretto.
We do not recommend the application of the pieces on surfaces particularly rough, as well on painted walls. For these reasons without knowing where and how will the product be used, the company disclaims any responsibility for installation on non-eligible and any misuse.
